1. DEMOGRAPHIA WORLD URBAN AREAS

Demographia World Urban Areas (Built-up Urban Areas or Urban Agglomerations) is the only annually published inventory of population, corresponding land area and population density for urban areas with more than 500,000 population. Unlike some other regularly produced lists, *Demographia World Urban Areas* applies a generally consistent definition to built-up urban areas.¹ Urban footprint data is reported without regard to political boundaries that are generally associated with metropolitan areas or sub-national jurisdictions. As used in this report, all instances of the term “urban area” are defined as “built-up urban area” (Section 3)

Demographia World Urban Areas contains population, land area and population density for the more than 1,050 identified built-up urban areas (urban agglomerations or urbanized areas) in the world with 500,000 or more population that have been identified. The total population of these urban areas is estimated at 2.25 billion, 51.4 percent of the world urban population in 2020.²

¹ Some other urban agglomeration lists mix metropolitan areas, municipalities (parts of metropolitan areas) and urban areas (built up urban areas or agglomerations). None of these lists include urban land area data. The United Nations list is unique in providing notes that clarify the nature of its each of its listings (core cities, metropolitan areas, urban areas and others).

² Calculated using United Nations data.

2. REVISED POPULATION ESTIMATION METHODOLOGY

The preferred source for built-up urban area population and land area is directly provided by national statistical authorities. However, few nations provide this information.

The best alternative to official built-up urban area from national statistical authorities is now from small area population grids. A review of the available sources has found the Commission Global Human Settlement (GHS2015) 250 meter database to be appropriate for the purposes of *Demographia World Urban Area* population estimation.³ Base year populations for the *Demographia* produced built-up urban area perimeters⁴ can be derived this source. The base population estimates for most 1,000,000 and larger urban areas are from GHS2015. The data in many of the 500,000 to 1,000,000 population urban areas are also from GHS 2015.

3. BUILT-UP URBAN AREAS: DEFINITIONAL ISSUES

There is considerable confusion about urban definitions, as is discussed below

3.1. What is a Built-Up Urban Area?

Built-up urban areas *are not* metropolitan areas.

An urban area ("built-up urban area,"⁵ urbanized area or urban agglomeration)⁶ is a continuously built up land mass of urban development that is *within* a labor market (metropolitan area or metropolitan region). An urban area contains *no* rural land (all land in the world is either urban or rural). In some nations, the term "urban area" is used, but does not denote a built-up urban area.⁷

An urban area is best thought of as the "urban footprint" --- the lighted area ("city lights") that can be observed from an airplane (or satellite) on a clear night. National census authorities in Australia, Canada, Denmark, Finland, France, the Netherlands, Norway, Sweden, the United Kingdom and the United States designate urban areas. Except in Australia, the authorities generally use a minimum urban density definition of 400 persons per square kilometer (or the nearly identical 1,000 per square mile in the United States) in areas that comprise urban areas.

³ European Commission Global Human Settlement: GHS_POP_E2015_GLOBE_R2019A_54009_250_V1_0 dataset, (https://ghsl.jrc.ec.europa.eu/ghs_pop2019.php).

⁴ All built-up urban area perimeters are produced by *Demographia* except for those provided by national statistical authorities.

⁵ "Built up urban area" is the new urban area term now used by National Statistics in the United Kingdom. It may be the most descriptive short term for urban areas.

⁶ Called a "population centre" in Canada and an "urban centre" in Australia.

⁷ For example, in China, sub-city or sub-regional districts called "shixiaqu" (市辖区) are sometimes referred to as urban areas. Shixiaqu resemble metropolitan areas, containing both urban and rural land. Districts designated as urban often have large tracts of rural land on which urban development is anticipated.

By necessity, average population density data masks significant variations within urban areas. Within urban areas, urban population densities can range from below 400 per square kilometer (1,000 per square mile), particularly in North American urban areas, to over 1,000,000 per square kilometer (2,500,000 per square mile) in informal neighborhoods⁸ of some Asian urban areas, such as Dhaka (See: *The Evolving Urban Form: Dhaka*).⁹

Varying densities within urban areas are illustrated by comparing by the Phoenix urban area which is at least 60 percent denser than the Boston-Providence urban area. Yet, the highest small are population densities within Boston-Providence are at least five times that of the highest density areas in Phoenix. Moreover, Boston-Providence has a far larger commercial core (“central business district” or “downtown”). The difference is that the Phoenix suburbs are denser than the Boston-Providence suburbs.

Higher density suburbs are also responsible for making Los Angeles the most densely populated large urban area in the United States, despite its much lower urban core densities relative to New York (See: *California’s Dense Suburbs and Urbanization*¹⁰). This creates an irony that the city most associated with urban dispersion (“urban sprawl”) in the United States is, in reality, the least dispersed (least “sprawling”). At the same time, no urban area in the world sprawls over a larger area than New York, as is indicated in Table 3.

Similarly, London and Athens have similar population densities. Yet, the core densities in Athens are considerably higher than in London. The Athens suburbs, however, are among the least dense in the high-income world. The Essen-Dusseldorf and Milan urban areas have almost identical densities, yet core densities are considerably higher in Milan. *Demographia World Urban Areas* reports the estimated population and density of *entire* urban footprints, regardless of their internal density profiles.

3.2: Urban Areas Contrasted with Metropolitan Areas

An urban area (built-up urban area or urban agglomeration) is fundamentally different from a metropolitan area. A metropolitan area is a labor market (and a housing market). It includes a principal built-up urban area (the largest built-up urban area in the metropolitan area) as well as economically connected rural areas (and smaller urban areas) to the outside. (Figure 6).¹¹

⁸ Called slums, shantytowns or favelas in various geographical areas.

⁹ Wendell Cox, (2012), “The Evolving Urban Form: Dhaka,” *The New Geography*, <http://www.newgeography.com/content/003004-evolving-urban-form-dhaka>.

¹⁰ See: Wendell Cox (2018), “California’s Dense Suburbs and Urbanization,” *The New Geography*, <http://www.newgeography.com/content/005908-californias-dense-suburbs-and-urbanization>.

¹¹ All land is that is not urban is considered rural.

Urban areas draw employees from a labor market area larger than the area of continuous development. For example, INSEE, the census authority of France defines the Paris urban area ("unité urbaine") as 2,845 square kilometers and the Paris metropolitan area (aire urbaine) as 17,100 square kilometers, indicating that more than 80 percent of the land area is outside the Paris urban area (See: *The Evolving Urban Form: Paris*¹²). Similarly, in the United States, 52 metropolitan areas with more than 1,000,000 population in 2010 had only 19 percent of land in urban use, with the remainder of 81 percent being rural (See: *Rural Character in America's Metropolitan Areas*¹³).

Because of the fundamental differences between urban areas (or urban agglomerations) and metropolitan areas, population comparisons should be made only within the two categories, not between. To mix the two is akin to comparing "apples and oranges."

3.3: Metropolitan Area Densities are not Urban Densities

Metropolitan area densities can be calculated, but are not a representation of urban densities, because *all* metropolitan areas include suburban land, which is therefore not urban. Urban densities can be calculated only using urban populations and land areas, which necessarily exclude rural data. All metropolitan areas have rural areas and thus metropolitan density is not a genuine measure of urban density.

Moreover, comparing metropolitan areas is fraught with difficulty, because (1) there are no international standards for delineating metropolitan areas, rendering them non-comparable between nations and (2) geographical "building blocks" may be too large to reasonably estimate the geographical extent of metropolitan areas.

Even within nations, comparison of metropolitan area densities can be invalid. This is illustrated by metropolitan areas in the United States, where counties are used as the building blocks. The size of counties in the United States varies up to 1,500 times and, as a result, metropolitan densities are strongly influenced by the densities of the rural areas surrounding the built-up urban areas. The metropolitan area with the largest land area in the United States is Riverside-San Bernardino, at 27,300 square miles (71,000 square kilometers). This is nearly as large as Austria. Most of this area is well beyond commuting range, which means that Riverside-San Bernardino is much larger than its genuine labor or housing market. The situation is similar, but not as extreme in some other metropolitan areas of the United States. Metropolitan

Urban Areas & Metropolitan Areas: Contrast EXAMPLE: PARIS URBAN & METROPOLITAN AREA

Figure 2

¹² Wendell Cox (2018), "The Evolving Urban Form: Paris," *The New Geography*, <http://www.newgeography.com/content/005912-the-evolving-urban-form-paris>.

¹³ Wendell Cox (2013), "Rural character in America's Metropolitan Areas," *The New Geography*, <http://www.newgeography.com/content/004088-rural-character-america-s-metropolitan-areas>.

area densities in the United States therefore cannot be compared with a reasonable level of precision as an indication of urban densities, even among themselves.

3.4: Urban Areas Contrasted with Municipalities (Cities or Communes)

An urban area is different from a municipality (also called a city, city proper, or a local government authority). Municipalities have political boundaries that usually constitute only a part of the urban area. For example, the city of Seoul represents less than one-half of the population (and a declining proportion) of the Seoul-Incheon urban area, which extends well beyond the municipality. On the other hand, a municipality may be considerably larger than an urban area and therefore contain considerable non-urban (or rural) territory. Zaragoza, Spain is an example. A large part of the municipality of Mumbai is rural, composed of the Rajiv Gandhi National Park and thus not included in the urban area.

The translated term "city" is generally used to denote sub-provincial (or in some cases provincial) government areas in China. These were formally referred to as "prefectures." Generally, they include rural areas and extend far beyond their built-up areas (such as Beijing, Tianjin, Wuhan and Guangzhou). The city of Chongqing, which has the largest population of any entity called a city (municipality) in the world and stretches far beyond any reasonable definition of a metropolitan area. Like the Riverside-San Bernardino metropolitan area, Chongqing covers a land area similar to that of Austria. Most of the municipality is well beyond the commuting range of the urban area.

The Chinese term "shi" is popularly translated as "city" in English. Chinese "shi" and equivalent terms are divisions of divisions of provinces or province equivalent. China is divided into more than 3,000 "shi," which are similar in number to the more than 3,000 counties of the United States. France has more than 30,000 communes, with most of their respective land areas typically being rural.

3.5: Urban Areas Contrasted with Adjacent Urban Areas

This report confines urban areas to a single metropolitan area (below) or labor market area. As a result, where urban areas have grown together but remain as (labor markets), they are considered "adjacent urban areas." Each component urban area is separately listed.

Examples of adjacent urban areas follow:

- The Pearl River Delta urban areas of Shenzhen, Dongguan, Zhongshan, Jiangmen, Huizhou, Zhuhai, Guangzhou and Foshan in China's Guangdong province are very close to one-another and in some cases the built-up urban areas are virtually adjacent. Yet, this is not considered a single urban area because there is not a single labor market. *Demographia World Urban Areas* considers Guangzhou and Foshan as a single urban area, because they have become more economically integrated than the other urban areas (such as by Metro system that serves both cities). Otherwise, each of the other urban areas in the Pearl River Delta economic region is considered to be separate. The Hong Kong and Macau urban areas are also adjacent to the adjacent urban areas of Guangdong (see "Adjacent International Urban areas," below). See:

*Ultimate City: Guangdong-Hong Kong-Macau Greater Bay Area (with Photographic Tour).*¹⁴ Plans call for significant transport improvements that could make all or part of this area a single labor market in the future.

- The Yangtze River Delta (broadly defined to include Hangzhou Bay) contains a number of nearby urban areas stretching from Zhoushan/Ningbo to Shanghai, and Nanjing. This includes the municipalities (prefectures) of Zhoushan, Ningbo, Shaoxing, Hangzhou, Jiaxing, Shanghai, Suzhou, Wuxi, Changzhou, Zhenjiang, Nanjing and other smaller urban areas. Adjacent urban areas in the Yangtze River Delta extend from Shanghai, through Suzhou and Wuxi to Changzhou. There are two other adjacent urban areas, Hangzhou and Shaoxing as well as Ningbo and Zhoushan. There is rural territory between Changzhou and Zhenjiang, Zhenjiang and Nanjing, Shanghai and Hangzhou as well as between Shaoxing and Ningbo. Plans call for significant transport improvements that could combine some of these adjacent urban areas into single urban areas in the future.
- The coast of Japan from Tokyo-Yokohama to Osaka-Kobe-Kyoto has nearly “grown together.” Yet, this ribbon of urbanization is far too large to be a single metropolitan area (labor market).
- The same applies to the Northeastern “megalopolis” of the United States. There is continuous development from the Philadelphia urban area, through the New York urban area, to the Hartford urban area. This continuous urbanization is considered as separate built-up urban areas because there are three labor markets (metropolitan areas).

International Urban Areas: Urban areas (and metropolitan areas) are confined to a single nation, unless there is virtual freedom of movement (principally labor) between the adjacent nations (or jurisdictions). Freedom of movement means that there are no customs or immigration facilities at borders, or that there are arrangements (such as readily available permits) for residents to live and/or work in any of the adjacent jurisdictions. Currently, this condition is met only between some continental nations of the European Union. For example, the Lille urban area is in both France and Belgium yet is considered a single urban area because there is freedom of labor movement without trade, immigration or customs barriers. Treaty provisions render Geneva (Switzerland)-Annemasse (France), Basel (Switzerland) along with suburban areas of France and Germany as a single built-up urban area. Similarly, Milan together with Chiasso in Switzerland is a single built-up urban area.

However, Detroit-Windsor El Paso-Ciudad Juarez and San Diego-Tijuana are not considered single urban areas because border controls restrict the free movement of labor. In China’s Pearl River Delta, the Macao and Hong Kong urban areas are considered separate from Guangdong urban areas due, at least partly, to the international-style border at the provincial border.

3.6: Combined Urban Areas

In the United States, single labor markets can be either metropolitan areas, or combined statistical areas (CSAs), which are, in effect, larger metropolitan areas or metropolitan regions, with somewhat less

¹⁴ Wendell Cox (2018), “Ultimate City: Guangdong-Hong Kong-Macau Greater Bay Area (with Photographic Tour),” *The New Geography*, <http://www.newgeography.com/content/006132-ultimate-city-guangdong-hong-kong-macao-greater-bay-area-with-photographic-tour>.

stringent economic interchanges (measured by employment commuting).¹⁵ Where continuous urban footprints exist within CSA, *Demographia World Urban Areas* combines them into a single built-up urban area. For example, the New York built-up urban area stretches from New York to other adjacent built-up urban areas, such as Bridgeport-Stamford, New Haven, Trenton and other metropolitan areas.

In addition, the US Census Bureau has retained some urban areas, despite their now continuous urbanization with other urban areas within the same metropolitan areas.¹⁶ *Demographia World Urban Areas* combines them into a single built-up urban area. Cleveland and Lorain, Ohio and Orlando and Kissimmee, Florida are examples of this (Table A-1).

In Canada, where the national census authority (Statistics Canada) defines metropolitan areas, the Toronto, Hamilton and Oshawa metropolitan areas are also considered a single labor market and are combined into a single combined urban area. While Canada does not designate combinations of metropolitan areas, Statistics Canada has indicated that if criteria similar to that of the United States were applied the Toronto, Hamilton and Oshawa metropolitan areas, they would constitute a combined metropolitan area.¹⁷

Other adjacent urban areas are combined in nations that do not report built-up urban area data. For example, Guangzhou and Foshan, and Tehran and Karaj are combined because of strong transport links that make commuting feasible.

4: DATA ISSUES

New census data and estimates as well as later satellite imagery has led to important revisions in recent editions of *Demographia World Urban Areas*:

- Statistical communiqués from many Chinese cities have shown population growth rates since 2010 that are far below earlier projections. This publication substitutes annual estimates based on the rate of growth of from the 2010 census to the latest available year, in larger urban areas where sufficient data is available. These estimates have been substituted in cases where a there is a Basis Population Code of “L.” (See related article: *Beijing and Shanghai Limit Population Growth*¹⁸).
- Canada has revised its method for delineation of built-up urban areas (population centres) in the 2016 census. Urban areas are now comprised of qualifying small area “blocks,” rather than the former municipalities. Some municipalities included large tracts of rural land and this revision

¹⁵ Metropolitan areas require a 25 percent employment interchange between constituent counties (US metropolitan areas are no longer based on central municipalities, but now use “central counties”). Combined statistical areas require a 15 percent employment interchange between metropolitan areas.

¹⁶ United States Census Bureau (2011), “Urban Area Criteria for the 2010 Census,” *The Federal Register*, <https://www2.census.gov/geo/pdfs/reference/fedreg/fedregv76n164.pdf>.

¹⁷ Statistics Canada (2008), “Defining and Measuring Metropolitan Areas: A Comparison between Canada and the United States,” <http://www.statcan.gc.ca/pub/92f0138m/2008002/5002030-eng.htm>.

¹⁸ Wendell Cox, (2019), “Beijing and Shanghai Limit Population Growth,” *The New Geography*, <http://www.newgeography.com/content/006258-beijing-and-shanghai-limit-population-growth>.

removed these areas from the urban areas. As a result, urban area densities in Canada are higher and land areas smaller than previously reported.

- A new population estimate for Kinshasa has been developed, from 2014 data provided by the Institut National de la Statistique of the Democratic Republic of the Congo (DRC). The data was not sufficient, however, to develop revised estimates for other built-up urban areas in the DRC.

Table A-1 COMBINED URBAN AREAS Designated only in Nations Reporting Urban Agglomeration Data	
NATION	COMBINED URBAN AREA & Constituent Urban Areas

United States	ST. LOUIS, MO-IL: St. Louis, Alton (IL-MO)
United States	WASHINGTON-BALTIMORE, DC-VA-MD: Washington, Baltimore, Waldorf (MD)
A combined urban area consists of adjacent urban areas that are located within the same labor market area (U.S. Combined Statistical Area) or equivalent).	

- A new population census ends more than 30 years since the last in Myanmar. Built-up urban area estimates have been updated using this information.
- The lower range population estimates for the Lagos built up urban area have been largely confirmed by the *Africapolis* project (see Geographical Notes,

World Population Distribution: 2019
URBAN (BY POPULATION) & RURAL

below). There has been considerable controversy about the population of Lagos for years and local governments had claimed the census of Nigeria had severely under-counted its population. The new information is generally consistent with the Nigerian federal government population data.

5. HIGHLIGHTS

In recent years, the world has become more than one-half urban for the first time in history (56.2 percent in 2020). Yet, it would be a mistake to believe that the world's urban residents live in settings similar to 5th Avenue in New York or within the fourth ring road of Beijing or in inner Paris, or for that matter in large urban areas. Nearly all of the world's large urban areas have extensive suburbs of much lower density outside the historic cores that are characterized by higher densities. Some post-automobile urban areas have little or no high-density urban core.

Distribution of World Population: Approximately 70 percent of the world's population live in urban areas with fewer than 500,000 residents¹⁹ or in rural areas in 2019 (See: *What is a Half-Urban World?*²⁰). Approximately 30 percent lives in urban areas with 500,000 or more population.²¹ Only 13 percent of the world's population lives in the urban areas of 5 million or more, approximately. China has more than 15 urban agglomerations of this size, the United States more than 10 and India 9 (Figure 1).

Distribution of Large Urban Population by Urban Density: More than one-half of the 500,000+ urban area population lived in built-up urban areas with between 4,000 and 10,000 persons per square kilometer (approximately 10,000 to 25,000 persons per square mile) in 2019. About 27 percent lived in urban areas with lower densities and 21 percent in higher density urban areas (Figure 2). Nearly one-half of the urban areas have densities between 4,000 and 10,000 per square kilometer and nearly one-quarter have densities of from 2,000 to 4,000 per square kilometer (Figure 3).

Distribution of World Population by Continent: More than one-half of the population of large built-up urban areas (500,000 and over) are in Asia (Figure 4). The Asian urban areas comprised 58 percent of the world's large urban area population in 2019.

Megacities: There are 35 megacities in the world (urban areas over 10 million population), revised as a result

Figure 4

¹⁹ The of urban areas under 500,000 is estimated by applying ratios from, *Making Room for a Planet of Cities* (Shlomo Angel, with Jason Parent, Daniel L. Civco, and Alejandro M. Blei) to the Demographia data.

²⁰ Wendell Cox (2012), "What is a Half-Urban World," *The New Geography*, <http://www.newgeography.com/content/003249-what-a-half-urban-world>.

²¹ Caution is recommended in comparing population categories with previous years. Because urban areas shift (generally upward) in population categories, the urban area components of each population category have changed. The of urban areas under 100,000 is estimated by applying ratios from, *Making Room for a Planet of Cities*.

of the new population estimation methodology from last year's 38 (Figure 5). A total of 88 urban areas have 5,000,000 or more population, up from 86 last year (Table 2).

Median Resident Analysis

Indicators of the "median resident" (middle resident) for the current year are provided as follows:

- The median world resident lived in an urban area of 625,000 residents in 2019 (including all urban and rural residents). This is the estimated population of urban areas such as Wroclaw, Poland; Suez, Egypt; Siping (Jilin), China; Kolhapur (Maharashtra), India; Albany (New York), US; and Mar del Plata, Argentina.
- The median resident of urban areas with 500,000+ population lived in an urban area with an average density of approximately 5,600 per square kilometer (approximately 14,500 per square mile). This is similar to the estimated population density urban areas such as London, Chongqing, Santiago, Chile; Khartoum and Morelia (Mexico).
- The median resident of urban areas with 500,000+ population lived in an urban area covering approximately 1,150 square kilometers (440 square miles). Urban areas such as Bangalore (Karnataka), India; Xi'an (Shaanxi), China; Baku, Azerbaijan; and Rome have similar densities.

6. GEOGRAPHICAL NOTES

Pakistan: The new 2017 census data has now been reported for Pakistan. This is the first complete census since 1998. *Demographia* had reported concerns about the reliability of population estimates in Pakistan. These concerns no longer exist.

West Africa: *Demographia World Urban Areas* uses base population data (2010) from *Africapolis*, where available (West Africa).²² *Africapolis* uses various techniques, including an analysis of satellite photographs to develop population estimates for built-up urban areas in West Africa. Moreover, the urban area definition used by *Africapolis* is consistent with the general approach by Western European governments that define built-up urban areas. The *Africapolis* data is particularly useful in West Africa, where most national statistical authorities (like those of most

Built-Up Urban Area Population: 2019
BY CONTINENT: 500,000 POPULATION & OVER

Figure 5

²² Agence Française de Développement, *Africapolis Urbanization Trends: 1950-2020: A Geo-statistical Approach West Africa*, http://www.afd.fr/webdav/site/afd/shared/PUBLICATIONS/THEMATIQUES/autres-publications/BT/Africapolis_Final-Report_EN.pdf.

nations) do not report urban agglomeration data.

Nigeria: Unlike other nations of West Africa, there have been strong criticisms of the Nigerian census for decades, which makes the *Africapolis* built-up urban area data particularly important in Nigeria. For example, the most recent federal census (2006) been severely criticized by local officials in Lagos state as having missed many people. The census indicated that Lagos metropolitan area population was approximately 9 million. By comparison, a local census conducted at about the same time indicated a population of 17.5 million. Authoritative neutral analysis generally finds lower population levels, more consistent with data from the federal census.²³ The detailed analysis by *Africapolis* is believed to be the most accurate population estimates for the urban areas of Nigeria.

Democratic Republic of the Congo: The government recently published provincial population estimates, which made it possible to produce a far more reliable estimate for the Kinshasa urban area, which constitutes nearly all of the population of Kinshasa province. Population estimates for other urban areas may be less reliable.

Specific Built-Up Urban Areas

Table A-2 below notes identify *some* additional components of urban areas that (1) might be thought to be separate urban areas, or (2) may be classified separate by statistical agencies or are (3) listed to indicate to better describe the geography of an urban area. Urban areas include many more components that are not indicated in Table A-2.

Table A-2 Specific Urban Areas: Notes	
Built-up Urban Area or Geography	Notes (See end of the table)
Aachen, Germany	Extends into the Netherlands; Includes Heerlen, Netherlands.
Abuja, Nigeria	Includes Kwamba
Akron, OH urban area, USA	Included in Cleveland
Alton, IL-MO urban area, USA	Included in St. Louis
Amersfoort, Netherlands	Included in Utrecht.
Amman, Jordan	Includes Az-Zarqa.
Amsterdam, Netherlands	Includes Haarlem
Ann Arbor, MI urban area, USA	Included in Detroit
Ansan, Korea	Included in Seoul-Incheon.
Atlanta, GA urban area, USA	Combined urban area. Includes Gainesville & Winder urban areas
Avondale, AZ urban area, USA	Included in Phoenix.
Bahadurgarh, Haryana, India	Included in Delhi.
Barnstable Town, MA urban area USA	Included in Boston-Providence
Basel, Switzerland	Extends into France and Germany
Bataysk, Russia	Included in Rostov.

Changtai, FJ China	Included in Zhangzhou
Chaoyang (Shantou), GD, China	Includes Chaonan
Charlotte, NC-SC	Combined urban area. Includes Charlotte (NC), Concord (NC), Gastonia (NC), Rock Hill (SC)
Chiasso, Switzerland	Included in Milan, Italy (single labor market)
Chicago, IL-IN-WI urban area, USA	Combined urban area. Includes Chicago, Kenosha and Round Lake Beach urban areas
Choloma, Honduras	Included in San Pedro Sula
Chungli, China: Taiwan	Included in Taipei.
Chuzhou, AN China	Includes Quanjiao
Ciudad Juarez, Mexico urban area	<i>Not combined with El Paso: (International Border Controls: Not a labor market)</i>
Cleveland, OH, USA	Combined urban area. Includes Cleveland, Akron, Lorain
Concord, CA urban area, USA	Included in San Francisco-San Jose
Concord, NC urban area, USA	Included in Charlotte
Conroe, TX urban area, USA	Included in Houston.
Dallas-Fort Worth, TX urban area, USA	Combined urban area. Includes Denton and McKinney urban areas
Danbury, CT urban area, USA	Included in New York.
Darwin, NT, Australia	Includes Palmerston.
Dashiqiao, LN China	Included in Yingkou
Daye, HUB, China	Included in Huangshui
Delhi, NCT, HA, UP, India	Includes Faridabad, Ghaziabad, Noida, Gurgaon and Bahadurgarh urban areas and New Delhi.
Denton, TX, USA	Included in Dallas-Fort Worth
Detroit, MI, USA	<i>Not combined with Windsor: (International Border Controls: Not a labor market)</i> , Combined urban area. Includes Detroit, Ann Arbor & South Lyon
Dhaka, Bangladesh	Nayaranganj included.
Dongguan, Guangdong, China	2010 census population was well below previous local estimates
Dongyang, ZJ, China	Included in Yiwu (Jinhua)

Table A-2 Specific Urban Areas: Notes	
Dover, NH-ME urban area, USA	Included in Boston-Providence
Dubai, UAE	Includes Sharja
Durham, NC urban area, USA	Included in Raleigh
Ejin Horo, NM, China	Includes Kangbashi
El Pasa, TX urban area, USA	<i>Not combined with Ciudad Juarez: (International Border Controls: Not a labor market)</i>
Ezhou, Hubei, China	Includes Huangzhou (Huanggang).
Faridabad, Haryana, India	Included in Delhi.
Foshan, Guangdong, China	Included in Guangzhou-Foshan
Francisco Morato, Sao Paulo, Brazil	Included in Sao Paulo
Fukuoka, Fukuoka, Japan	Shown as a separate urban area. Some sources combine Fukuoka with Kitakyushu (such as the United Nations).
Fushun, LN China	Included in Shenyang
Gainesville, GA urban area, USA	Included in Atlanta
Gama, GO Brazil	Included in Brasilia
Ganzhou, JX, China	Includes Nankang
Gaogang, Jiangsu, China	Included in Taizhou
Gastonia, NC urban area, USA	Included in Charlotte
Geneva, Switzerland	Extends into France
Gezbe, Turkey	Included in Istanbul
Ghaziabad, Uttar Pradesh, India	Included in Delhi.
Gongjing, SC, China	See Zigong
Guangzhou-Foshan, Guangdong, China	Includes Foshan
Gujranwali, Pakistan	Includes Kamoki
Gurgaon, Haryana, India	Included in Delhi.
Haarlem, Netherlands	Included in Amsterdam.
Hague, Netherlands	Included in Rotterdam-Hague
Hamilton, ON urban area, Canada	Included in Toronto.
Hebi, Henan, China	Includes Qi
Heerlen, Netherlands	Included in Aachen, Germany.
Helan, NX China	Included in Yinchuan
Himeji, Hyogo, Japan	Included in Osaka-Kobe-Kyoto.
Hitachi, Japan	Included in Mito.
Hong Kong, China	<i>Not combined with Shenzhen: (Border Controls: Not a labor market)</i>
Houston, TX urban area, USA	Combined urban area. Includes Conroe & Texas City
Huangmei (Huanggang), HUB	Included in Jiujiang, JX.
Huangshui, HUB	Includes Daye (county level city)
Huangzhou (Huanggang), Hubei, China	Included in Ezhou.
Hubli, West Bengal, India	Does not include Dharwad.

Table A-2 Specific Urban Areas: Notes	
Huiyang qu (Huizhou), Guangdong, China	Included in Shenzhen.
Huizhou, Guangdong, China	Huicheng qu only
Ikorodo, Nigeria	Included in Lagos
Incheon, South Korea	Included in Seoul-Incheon,
Indianola WA urban area, USA	Included in Seattle
Istanbul, Turkey	Includes Gezbe
Jakarta, Indonesia	Higher estimate than other sources (such as the United Nations), which are largely limited to DKI Jakarta. Continuous urbanization extends into Tangerang, South Tanerang, Borgor, Bekasi and Karawang.
Jianbizhen (qu), China	Included in Zhenjiang, JS
Jiangyin (Wuxi), GD, China	Included in Zhangjiaggang (Suzhou) JS
Jianshan, HL China	Included in Shuangyashan
Jinjiang, Fuzhou, China	Included in Quanzhou.
Jiujiang, JX, China	Includes Huangmei (Huanggang), HUB.
Jixian, HL China	Included in Shuangyashan
Kalyan, Maharashtra, India	Included in Mumbai (beginning in 2016).
Kamoki, Pakistan	Included in Gujranwali
Kangbashi (Ordos), NM, China	Includes Ejina Horo
Kashi, XJ, China	Includes Shule
Kansas City, MO-KS, USA	Combined urban area. Includes Kansas City (MO) & Lee's Summit (MO-KS)
Karaj, Iran	Included in Tehran.
Karawang, Indonesia	Included in Jakarta
Kenosha, WI, USA	Included in Chicago.
Kissimmee, FL urban area, USA	Included in Orlando.
Kitakyushu, Fukuoka, Japan	Shown as a separate urban area. Some sources combine Kitakyushu with Fukuoka (such as the United Nations), which is not a part of the continuous urbanization of Kitakyushu.
Kuala Lumpur, Malaysia	The population is higher other agglomeration estimates (such as the United Nations), which does not include all of the continuously developed urban area. Includes Port Klang.
Kulim, Malaysia	Included in Penang
Kwamba, Nigeria	Included in Abuja
Lagos, Nigeria	Includes Ikorodo & Loburo
Lagos, Nigeria	Demographia uses the Africapolis estimate as the base. See discussion above on Nigeria.
Lee's Summit, MO urban area, USA	Included in Kansas City
Leiden, Netherlands	Included in Rotterdam-Hague
Leon, Mexico	Includes Silao

Table A-2 Specific Urban Areas: Notes	
Leonminster, MA urban area USA	Included in Boston-Providence
Lille, France	Extends into Belgium (single labor market)
Livermore, CA urban area, USA	Included in San Francisco-San Jose
Loburo, Nigeria	Included in Lagos
Lorain, OH urban area, USA	Included in Cleveland
Los Angeles, CA urban area, USA	Combined urban area. Includes Riverside-San Bernardino and Mission Viejo urban areas
Luziana, GO Brazil	Included in Brasilia
Manchester, VT urban area, USA	Included in Boston-Providence
Manila, Philippines	Higher than other estimates, which are largely limited to the National Capital Region. Continuous urbanization extends into Cavite, Laguna, Bulacan and Rizal.
Maputo, Monzambique	Includes Matola.
Marseille, France	Demographia land area estimate used, because INSEE definition includes a large rural component.
Marysville, WA urban area, USA	Included in Seattle
McKinney, TX, USA	Included in Dallas-Fort Worth.
Mersin, Turkey	Includes Tarsus
Miami, FL, USA	Includes the former urban areas of Fort Lauderdale and West Palm Beach, which have been incorporated by the US Census Bureau.
Milan, Italy	The population is higher other agglomeration estimates (such as the United Nations), which does not include all of the continuously developed urban area, which stretches well into Como, Lecco and Varese provinces. Extends into Switzerland (single labor market). includes Chiasso, Switzerland.
Mission Viejo urban area, CA, USA	Included in Los Angeles.
Mito, Japan	Includes Hitachi
Moscow, Russia	Demographia is indebted to Richard Forstall, who has provided local authority area population data for portions of Moscow Oblast within the Moscow urban areas. Other estimates (such as the United Nations estimate) largely limited to the municipality of Moscow,
Mumbai, Maharashtra, India	Includes Kalyan, and the Panvel urban area. As of 2016, also includes the Census of India urban areas of Bhiwandi, Kalyan, Vasai-Virar beginning in 2016.
Nankang, JX, China	Included in Ganzhou
Napa, CA urban area, USA	Included in San Francisco-San Jose
Nara, Nara, Japan	Included in Osaka-Kobe-Kyoto.
Nashua, NH urban area, USA	Included in Boston-Providence
Navi Mumbai, Maharashtra, India	Included in Mumbai.
Nayaranganj, Bangladesh	Included in Dhaka.
New Bedford, MA urban area USA	Included in Boston-Providence

Table A-2 Specific Urban Areas: Notes	
New Delhi, NCT, India	Included in Delhi
New Haven, CT urban area, USA	Included in New York
New York, NY-NJ-CT urban area, USA	Combined urban area. Includes Bridgeport, New Haven, Trenton, Danbury, Waterbury and Twin Rivers urban areas
Noida, Uttar Pradesh, India	Included in Delhi.
Ogden UT urban area, USA	Included in Salt Lake City
Ordos, NM, China	See (1) Dongsheng or (2) Kangbashi
Orlando, FL urban area, USA	Combined urban area. Includes Kissimmee & Poinciana
Osaka-Kobe-Kyoto, Japan	Portions of the prefectures of Osaka, Kobe, Kyoto and Nara area included. Includes Himeji. United Nations estimates separate Osaka-Kobe and Kyoto and exclude both Nara and Himeji.
Oshawa, ON urban area, Canada	Included in Toronto.
Palmerston., NT, Australia	Included in Darwin
Panvel, Maharashtra, India	Included in Mumbai.
Penang, Malaysia	Includes Kulim
Philadelphia, PA-NJ-DE-MD, USA	Combined urban area. Includes Philadelphia (PA-NJ-DE-MD) & Pottstown, PA
Phoenix, AZ area, USA	Combined urban area. Includes Avondale and Buckeye urban areas
Pinglu (Yuncheng) SAX China	Included in Sanmenxia
Poinciana, FL urban area, USA	Included in Orlando
Port Klang, Malaysia	Included in Kuala Lumpur.
Portsmouth, NH-ME urban area, USA	Included in Boston-Providence
Pottstown PA urban area, USA	Included in Philadelphia
Providence, RI-MA urban area, USA	Included in Boston-Providence
Provo, UT urban area, USA	Included in Salt Lake City
Qi, Henan, China	Included in Hebi
Quanjiao, AN China	Included in Chuzhou
Quanzhou, Fuzhou, China	Includes Shishi and Jinjiang
Qijing, YN China	Includes Zanyi
Raleigh, NC urban area, USA	Combined urban area. Includes Durham urban area.
Riverside-San Bernardino, CA urban area, USA	Included in Los Angeles.
Rock Hill, SC urban area, USA	Included in Charlotte
Rostov, Russia	Includes Bataysk.
Rotterdam-Hague, Netherlands	Includes Leiden
Round Lake Beach, IL, USA	Included in Chicago.
Saarbrücken, Germany	Extends into France
Salt Lake City, UT	Combined urban area. Includes Ogden & Provo urban areas
Salzburg, Austria	Extends into Germany (single labor market)
San Diego, CA urban area, USA	<i>Not combined with Tijuana: (International Border Controls: Not a</i>

Table A-2 Specific Urban Areas: Notes	
	<i>labor market)</i>
San Francisco-San Jose, CA urban area, USA	Combined urban area. Includes San Jose, Concord, Livermore, Napa and Vallejo urban areas.
San Jose, CA urban area, USA	Included in San Francisco-San Jose
San Pedro Sula, Honduras	Includes Choloma.
Sanmenxia, HEN China	Includes Pinglu (SAX)
Sao Paulo, Sao Paulo, Brazil	Includes Francisco Morato.
Seattle, WA urban area, USA	Combined urban area. Includes Bremerton, Indianola & Marysville.
Seoul-Incheon, Korea	Includes Suweon and Ansan.
Shanghai, China	Includes Taicang
Sharja, UAE	Included in Dubai.
Shenyang, LN China	Includes Fushun
Shenzhen, GD, China'	<i>Not combined with Hong Kong: (Border Controls: Not a labor market)</i>
Shenzhen, Guangdong, China	Includes Huiyang qu (part of Huizhou shi). 2010 census population was well below previous local estimates.
Shijiazhuang, HEB, China	Includes Zhengding
Shishi (shi), Fuzhou, China	Included in Quanzhou.
Shuangyashan, HL China	Includes Jianshan & Jixian
Shule, XJ, China	Included in Kashi
Silao, Mexico	Included in Leon
South Lyon, MI urban area, USA	Included in Detroit
St. Louis, MO-IL, USA	Combined urban area. Includes St. Louis (MO-IL) & Alton (IL-MO)
Strausbourg, France	Extends into Germany (single labor market)
Stuttgart, Germany	Lower estimate than some other sources (such as the Millennium City database)
Suweon, Korea	Included in Seoul-Incheon.
Taicang, China	Included in Shanghai.
Taipei, China: Taiwan	The population is higher than other estimates (such as the United Nations), which do not include all population within the continuously developed urban area (especially in Taipei County). Includes continuous urbanization in New Taipei and Taoyuan.
Taiyuan, Shanxi, China	Includes Yuci qu (Jinzhong).
Taizhou, Jiangsu, China	Includes Gaogang
Taoyuan, China: Taiwan	Included in Taipei.
Tarsus, Turkey	Included in Mersin
Tehran, Iran	Includes Karaj.
Texas City, TX urban area, USA	Included in Houston
Tijuana, Mexico urban area	<i>Not combined with San Diego: (International Border Controls: Not a labor market)</i>
Tokyo-Yokohama, Japan	Includes large areas Tokyo, Kanagawa, Chiba and Saitama prefectures and smaller areas of Gunma, Tochigi and Ibaraki

Table A-2 Specific Urban Areas: Notes	
	prefectures.
Toronto, ON urban area, Canada	Combined urban area, Includes Hamilton and Oshawa
Trenton, NJ urban area, USA	Included in New York.
Twin Rivers, NJ urban area, USA	Included in New York.
Utrecht, Netherlands	Includes Amersfoort.
Utsonomiya, Japan	Included in Tokyo-Yokohama
Vallejo, CA urban area, USA	Included in San Francisco-San Jose
Vasai-Virar, Maharashtra	Included in Mumbai (beginning in 2016).
Weinan, Shaanxi, China	Includes Xinfencun
Wenzhou, ZJ China	Includes Yueqing
Windsor, ON urban area, Canada	<i>Not combined with Detroit: (International Border Controls: Not a labor market)</i>
Worcester, MA urban area, USA	Included in Boston-Providence
Xi'an, Shaanxi, China	Includes Xiangyang.
Xiangyang, Shaanxi, China	Included in Xi'an.
Xicheng, Ningxia, China	Included in Yinchuan.
Xinfencun, Shaanxi, Chia	Included in Weinan
Yanzhou, Jiangsu, China	Includes Jiangdu shi.
Yinchuan, Ningxia, China	Includes Henan, Xicheng and Yongning.
Yingkou, LN China	Includes Dashiqiao
Yiwu (Jinhua), ZJ China	Includes Dongyang.
Yongning, NX China	Included in Yinchuan
Yuciqu (Jinzhong), Shanxi, China	Included in Taiyuan.
Yueqing, ZJ China	Included in Wenzhou
Zanyi, YN China	Included in Qujing
Zhangjiaggang (Suzhou) JS China	Includes Jianyin
Zhangzhou, FJ China	Includes Changtai
Zhengding, HEB, China	Included in Shijiazhuang
Zhenjiang, Jiangsu, China	Includes Jianbizhen qu.
Zigong, SC, China	Also known as Gongjing
<i>Note: Notes indicating inclusion ("includes" or "included in") are for geographical illustration only and are not intended to be a comprehensive description of urban area components. All components (urban areas) of "Combined urban areas" are indicated.</i>	

7. METHODOLOGY

The current year population estimate is modeled from the base year population, adjusted by population projections between the base year and the current year. Most population projections are from the United Nations. The base year and population is indicated for each urban area in Table 5.

National census authority population land area data is used where it is reported for urban areas and generally consistent with international practice, (Section 4: Built-Up Urban Areas: Definitional Issues, above). For other urban areas, Demographia uses mapping software to estimate continuous urbanization.

Demographia uses small area population data, where available, to match population estimates to urban land area.

7.1: Sources for Base Population & Land Area Estimates

Basis codes indicate the source of population and land area estimates, as is indicated in Table A-3.

Presentation of Basis Codes in Tables: The Basis codes are listed in the “Pop:Area Basis” column following this form: “C:B”, where “C” indicates the source from which the base population was estimated and “B” indicates the source of the land area estimate. In this example, the population base is estimated by Demographia and the land area data is estimated by Demographia.

7.2: Reliability

The most reliable bases (sources) are as follows:

- National census authorities, where representative agglomeration data is available (such as in the United States, the United Kingdom, Canada, France, Sweden, Norway, India and Australia).
- EU GHSL Dataset: GHS_POP_E2015_GLOBE_R2019A_54009_250_V1_0.
- Africapolis population and land area estimates (Basis code W), which replicate the results that would likely be obtained if census authorities in West Africa reported built-up urban area data.
- Demographia population estimates.

Table A-3 Basis Codes: Population and Land Area (2020 and later editions)	
Code	Basis of Land Area or Base Year Population Estimate
A	Based on National census authority built-up urban area data (land area or population).
B	<i>Demographia</i> land area estimate based upon map or satellite photograph analysis.
C	<i>Demographia</i> population from lower order jurisdictions, with downward adjustment for rural population.
D	Based on United Nations agglomeration estimate.
G	EU GHSL Dataset: GHS_POP_E2015_GLOBE_R2019A_54009_250_V1_0
F	Other population estimate or other <i>Demographia</i> population estimate..
L	Same as category “C”, based on a local government population estimate.
W	Based on <i>Africapolis</i> population estimate

7.3: Urban Density Calculations

Demographia World Urban Areas provides average urban population density data.

It is not possible to precisely coordinate the dates of current population estimates with land area estimates, except in cases where the built-up urban area population and land area are provided by national statistical

authorities (Basis Code A:A). However, *Demographia* attempts to best match population estimates within the urban areas with their geographical footprint as indicated in Tables 2 through 5.

- Where national census authorities report both built-up urban area population and land area in a manner generally consistent with international practice, the density calculation uses the base year population (in Table 5) divided by the land area. As a result, the density estimate is for the *base year*, not the current year.
- In all other cases, the density calculation is the latest population estimate divided by the latest land area estimate.

Urban population densities should be considered reasonable approximations.

8. CAUTION: TREND ANALYSIS

Demographia World Urban Areas is a continuing project and attempts to provide “state of the art” data. Revisions are made as more accurate satellite photographs and population estimates become available. As a result, *Demographia World Urban Areas* is not intended for trend analysis.

Year-to-year changes indicated in population and land area may merely reflect better data that was not available before and may not, therefore indicate a trend. Moreover, the current year population estimates are a projection from a base year. Changes in population projection rates can result in substantial current year population estimates that may or may not reflect actual changes in population. Further, population and land area base data is updated as new data is obtained.

9. DEMOGRAPHIA WORLD URBAN AREAS: BACKGROUND

Demographia World Urban Areas is in its 15th year of publication. It was established for the purpose of bringing consistency to the subject of urban density, in hopes of replacing anecdotal comparisons between cities that are often grossly invalid. The built-up urban area is the only level at which there is sufficient data to estimate the densities of the urban organism at anything approximating international standards. Even with this data, the science of urban area density is in its infancy.

Demographia World Urban Areas was the first source to identify the under-estimation of population in some of the world’s largest urban areas. For example, *Demographia’s* early estimates of the Jakarta, Delhi, Manila and Kuala Lumpur urban area populations were far higher than reported by others at the time. Other sources have since revised their estimates upward.

The earlier, lower estimates by other sources were, in actuality, municipal estimates that did not sufficiently take into consideration the spread of urbanization beyond the core city limits or other geographical limits. *Demographia’s* larger population estimates were the result of actual satellite map examination of the urban form. Similarly, in many cases, *Demographia’s* estimates have been lower than reported elsewhere for the same reason --- some other urban area estimates have included rural areas, which, by definition, are not urban.

10. COVER ILLUSTRATION: ZHUJIANG NEW TOWN, GUANGZHOU

Zhujiang New Town is new central business district of Guangzhou in the Guangzhou-Foshan urban area. It is located to the east of the older center, and spans the Zhujiang (Pearl River). The view is to the north, toward the CITIC Plaza (middle, in the distance). The Canton Tower, the second tallest free standing tower in the world, is just across the river, to the south. The 111 floor CTF Finance Centre is to the right, the 8th tallest building in the world, and opened in 2016. The 103 story Guangzhou International Finance Centre is to the left, the 26th tallest building in the world. When the 80 story CITIC Plaza opened in 1997, it was the 7th tallest building in the world. See: *Ultimate City: Guangdong-Hong Kong-Macao Greater Bay Area* at <https://www.newgeography.com/content/006132-ultimate-city-guangdong-hong-kong-macao-greater-bay-area-with-photographic-tour>. 11. COMMENTS AND SUGGESTIONS

Demographia wishes to produce the most accurate possible estimates. This edition incorporates changes from suggestions that were deemed to be appropriate. Comments, suggestions, criticism and data are welcomed.

Ranked by population per square kilometer

Urban density calculation: Current Year (2020) except where Population Basis ="A" where urban density figure (only) is for latest population year.

Table 5
ALPHABETICAL LIST OF BUILT-UP URBAN AREAS: 2020

Urban Areas 500,000 & Over Population

Popula. Rank	Geography	Urban Area	Population Estimate	Built-Up Land Area		Urban Population Density		Basis:Pop: Area
				Square Miles	Square Kilometers	Per Square Mile	Per Square Kilometer
